ANTISLIP NOISE REDUCTION

ANTISLIP SILICON RING

ANTISLIP RUBBER RING

Mediante l'utilizzo di una guarnizione in gomma integrata nel fondo delle stoviglie viene data maggiore stabilità. Infatti vengono quasi azzerate le possibilità di scivolamento e caduta e inoltre viene notevolmente ridotto il fastidioso tintinnio nel caso di spostamenti.

Through the use of a rubber seal, integrated in the base of the dish- and drinkware, a much greater stability is guaranteed. In fact, the possibilities of slipping&falling are almost zero and also the annoying rattling noise when travelling is greatly reduced.

Durch die Verwendung eines im Boden integrierten Gummirings wurde allen Geschirrtteilen Rutschfestigkeit und Stabilität verliehen. In der Tat ist ein Wegrutschen und Hinunterfallen kaum noch möglich. Zudem werden durch den Antislip-Ring die lästigen Klappergeräusche während der Fahrt erheblich vermindert.

Door het gebruik van een rubberen afdichting, geïntegreerd in de basis van de schotel en drinkware, wordt een veel grotere stabiliteit gegarandeerd. In feite, de mogelijkheden van uitglijden en vallen zijn bijna nul en ook het vervelende ratelende geluid bij het reizen is sterk verminderd.
